Aster Vale Demonstration Clinic (fictional)

Chest radiograph report

Patient: Daniel M. (synthetic) | ID: SYN-001 | DOB: 1978-10-06

Encounter: ENC-001-06 | Source: DOC-001-20 | Type: radiology_report

Clinical time: 2026-07-08T10:00:00+03:00

Documented: 2026-07-08T12:00:00+03:00 | Author: Dr Sera Flint, radiology (fictional)

SYNTHETIC — NOT FOR CLINICAL USE

Exam: PA and lateral chest radiograph.

Indication: Persistent cough.

Technique: Standard two-view study (fictional report).

Comparison: April 30, 2026. Findings: Persistent right basal opacity, slightly more conspicuous; no pleural effusion. Impression: Unresolved focal opacity. Expedite CT chest and respiratory review. Radiograph alone does not establish etiology.

Any attached image is an externally sourced reference radiograph, not an examination of this simulated patient.
