Aster Vale Synthetic Hospital

The Diagnosis That Explained Too Little record 5

Internal Medicine

SYNTHETIC - NOT FOR CLINICAL USE
Patient: SYN-004 | Encounter: ENC-004-05
Ambulatory monitor report: 14-day monitor captured three episodes of supraventricular tachycardia, maximum rate 164 bpm, with patient-triggered palpitations. This objective finding warrants reconsideration of an anxiety-only explanation; it does not establish a single final diagnosis.
